LITE-ALUMINUM
SUPERSTRUCTURE

ACTUALLY, WE CAME FIRST.

We set our standards high, and so should you. That's why we created and developed the famous Lite Aluminum Superstructure. This ultra-light structure means a smoother ride, less gas consumption, and a stronger body. By the looks of other brands, it's clear that they

THE BEEFIEST FRAME
All of our frames feature rugged box steel. Titan fifth wheels, however, are 16" deep at the central frame—strongest in the industry!

INSULATION
We insulate everything, even the holding tanks and valves. Roofs get R-11 and floor and sidewalls feature R-7 insulation.

BUILT RIGHT
All of our travel and fifth wheel trailers feature the original Lite Aluminum Superstructure framing that's made us famous.

thought our idea was pretty good, too. Of course, if you look closer, you'll see they use far less aluminum and structural support. We pioneered the Superstructure over 10 years ago because we care about quality. And the first is still the best.
